- Digital Transformation & Strategy
- Cloud Infrastructure Engineering
- AI Augmentation

Program Management & Business Operations Support

- Training & Readiness Support
- Administrative & Management Services
- Financial, Acquisition & Logistics Support Services
- Workflow Automation
- Records Management

Innovation-centric and national security & readiness-focused small business specializing in innovative practices like AI Integration, Zero Trust, Post-Quantum Cryptography, and attributable unmanned autonomous systems.

Heavily invested in implementing new ideas, fostering new approaches, and implementing the latest technologies through self-funded research:

- ✓ Development of a geo-temporal analysis system utilizing AI/ML/NLP techniques for applications in Intelligence Analysis, Law Enforcement Investigation and Mental Health Research and Treatment.
- ✓ AI-based conversational customer support system that reduces costs and increases the responsiveness of call centers/helpdesks.
- ✓ Unmanned aerial systems (UAS) build course that delivers competency-based, learner-centric training that *develops future-ready Soldiers and Marines capable of designing, constructing, and deploying unmanned aerial systems* in support of dynamic operational environments and operational self-sufficiency.

Advent's Lean Management approach offers:

- ✓ Reduced risk, flexibility, increased responsiveness, and an effective customer interface through ISO-level quality services
- ✓ Ability to work in and/or manage fast-paced, changing environments with minimal disruption of service while preserving

Differentiators
